JUDICIAL STATISTICS

## Presentation

As part of its policy of transparency, the General Council of the Judiciary (GCJ), has taken, for the tenth time, the step of compiling “The Justice System: all the facts”, which sets out the key statistics for 2012 relating to the various elements making up the Spanish court system, including several comparisons with data compiled in the years before. It is elaborated to show a general view over the complex activity of the judiciary.

The full document may be accessed at [www.poderjudicial.es](http://www.poderjudicial.es), and [www.pnj.cgpi.es](http://www.pnj.cgpi.es), where there is also available the complementary and most updated information.

Most of the information was provided by the General Council of the Judiciary itself, although other official sources were also employed. We are very grateful for their collaboration.

## **PERSONNEL TURNOVER** <sup>21</sup>

---

<sup>21</sup> Source: Judicial Statistics of the GCJ

Using the data on the organic staff of judicial bodies and the staff status contained in the statistics reports, three indicators have been prepared on the staff status, applied to each of the professional categories. These indicators are as follows:

**Percentage of coverage by non-permanent staff (PCNP):** The total number of days in which positions of a particular category have been occupied by non-permanent staff members, divided by the number of staff members in that category multiplied by 365. This is expressed as a percentage.

**Percentage of non-covered days (PNCD):** The total number of days in which positions of a particular category have been left uncovered, divided by the number of staff members in that category multiplied by 365. This is expressed as a percentage.

**Rotation index (RI):** Number of investitures both of permanent positions and others, divided by the organic staff in the category. This is a measurement of the stability of the staff.

## RATES

**Disposal rate.** Number of proceedings disposed of divided by the number of incoming cases related to a certain period of time. It relates the number of incoming cases to the capability to decide the cases.

**Pending rate.** Number of pending proceedings at end of the year divided by the number of proceedings disposed of.

**Decision rate:** Number of judgements divided by the number of proceedings disposed of. Data is shown by percent

**Clearance rate.** A quotient where the numerator is the sum of the pending and incoming proceedings at the beginning of the period and the denominator is the number of cases disposed of in the same period.

## **THE QUALITY OF THE COURT SYSTEM**

## JUDGMENTS BY TYPE OF JUDGE

One indicator of the quality of judgments is the percentage decreed by professional judges who have undergone the official competitive examination process. The data provided in the third column (Deputies) of the following tables refer to non-professional judges.

## ESTIMATED LENGTH OF PROCEEDINGS

The average length of proceedings is another very important indicator of the Quality of the Justice. As the Judicial Statistics does not offer direct data from lengths, we present a set of evaluation produced by a mathematical model, according to the data from General Council of the Judiciary. Judicial Statistics: set down, disposed of and pending proceedings at the end of every period of time. It offers an estimation of the average length of the cases ended in each period. **The lengths are stated in months**
