PERSONNEL TURNOVER²⁵

²⁵ Source: Judicial Statistics of the GCJ. 2019

Using the data of the court staff in judicial bodies and the staff status contained in statistics reports, three indicators have been prepared on the staff status, applied to every professional status. These indicators are as follows:

Percentage of coverage by non-permanent staff (PCNP): Relationships between the number of days in which positions of a concrete professional status have been occupied by non-permanent staff members, and the total of those professional status members, multiplied by 365. This is expressed as a percentage.

Percentage of non-covered days (PNCD): Relationships between the number of days in which positions of a concrete professional status have been uncovered, and the number of those professional status members, multiplied by 365. This is expressed as a percentage.

Rotation index (RI): Relationships between of number of investitures both of permanent positions and others, and the staff allocated for that professional status. This is a measurement of the stability of the staff.

ESTIMATED LENGTH OF PROCEEDINGS

The average length of proceedings is another very important indicator of the Quality of the Justice. As the Judicial Statistics does not offer direct data from lengths, we present a set of evaluation produced by a mathematical model, according to the data from General Council of the Judiciary. Judicial Statistics: Incoming cases, resolved cases and pending proceedings at the beginning of every period of time. It offers an estimation of the average length of the cases ended in each period. **Length is stated in months**⁴⁵.
